Press Release: New Division

FOR IMMEDIATE RELEASE  
August 1, 2004

## The Delp Mixer Co. Is Formed to Meet Consumer Needs

*Delp & Associates Adds New Division*

**Columbus, Ohio** - Delp & Associates, LLC a leading designer / manufacturer of unique mechanical solutions and problem-solving laboratory equipment is pleased to announce the formation of a new division; The Delp Mixer Co. The new company will focus on the manufacture and sale of high quality devices for bench-scale (volumes from 100ml to 5L) mixing in all chemical and scientific disciplines. The new division will operate from the Delp & Associates offices in Columbus, Ohio. Delp & Associates will continue to offer the design and manufacture of built-to-task products for the polymer, pharmaceutical and life science industries.

The Delp Mixer Co. will address the consumer demand for versatile, durable laboratory mixing equipment that is also simple to use. "Our roots are in laboratory research, so we recognize the value of a tool that is easy to use, easy to assemble and easy to maintain. All those qualities are present in every item offered by The Delp Mixer Co.," says President, Lisa Delp. Product focus will be on mixers that mount easily to standard laboratory glassware, can be used in multiple configurations and require little maintenance. When asked which industry the new company would pick as its' focus, Mrs. Delp replied, "our focus is based on the researcher and the process, not on their industry classification. Whether they are engaged in pharmaceutical, life science or biotech research, if they are working in glassware at the bench level we can help them to do so with increased efficiency and reduced cost."

Based in Columbus, Ohio, The Delp Mixer Co. produces the Delp Mixer, its signature line of laboratory mixers. More information about the company and products can be obtained by contacting Lisa Delp at 614-889-1935 or by visiting the company website at [www.DelpMixer.com](http://www.DelpMixer.com).
